LinkedIn: <https://www.linkedin.com/in/ishwari-naik-88101240a>

PROFESSIONAL SUMMARY

AI/ML and Software Development enthusiast with hands-on experience building AI-powered applications using Python, FastAPI, APIs, and LLMs. Continuously building practical projects involving AI-powered resume parsing, job matching, document processing, RAG, and AI assistants. Familiar with prompt engineering, REST APIs, Git, GitHub, and full-stack application development, with a strong interest in applying AI to real-world problems.

EDUCATION

Bachelor's Degree in Information Technology

Padre Conceicao College of Engineering 2024 – 2028

TECHNICAL SKILLS

Programming Languages:

Python, Java, C, C++, JavaScript, HTML, CSS

Backend & Frameworks:

FastAPI, REST APIs

AI & Machine Learning:

AI/ML, Large Language Models (LLMs), RAG, Prompt Engineering

Libraries & Tools:

Groq API, Pydantic, PyPDF, python-dotenv

Version Control:

Git, GitHub

HANDS-ON EXPERIENCE

AI & Software Development — Ongoing

Hands-on Project Experience

Continuously developing practical AI and software applications while expanding skills in Python, FastAPI, LLMs, RAG, APIs, and document processing.

Building AI-powered applications to solve practical problems.

Developing backend applications and APIs using Python and FastAPI.

Integrating LLMs and Groq APIs into AI applications.

Working with PDF and document processing for extracting structured information.

Exploring Retrieval-Augmented Generation (RAG) and prompt engineering.

Using Git and GitHub for project development and version control.

Building and experimenting with AI-based portfolio and recruiter-assistance applications.

PROJECTS

PlantLens — Plant Identification Application

A mobile application designed to identify plants using leaf images.

Allows users to capture or upload plant images.

Analyzes plant images to identify the plant.

Designed to make plant learning easier and more interactive for students and plant enthusiasts.

Combines mobile application development with image-based plant identification.

Technologies: Python, Image Processing, Mobile Application Development

AI Resume Parser

An AI-powered application that processes resumes and converts unstructured resume information into structured data.

Extracts information such as personal details, education, skills, and experience.

Uses PDF processing to read resume documents.

Uses an LLM to understand and structure extracted resume information.

Implements structured data models using Pydantic.

Provides a backend API using FastAPI.

Technologies: Python, FastAPI, Groq, LLMs, Pydantic, PyPDF

AI Portfolio / Hire-Me Assistant

An AI-powered portfolio application designed to help recruiters understand and evaluate a candidate's profile.

Presents personal information, education, skills, projects, and experience.

Allows recruiters to provide or upload a job description.

Compares job requirements against the candidate's actual profile.

Provides an AI-based assessment of job suitability.

Designed to give honest results without inventing skills, qualifications, or experience.

Explores the use of LLMs, RAG, document processing, and APIs.

Technologies: Python, FastAPI, Groq, LLMs, RAG, PDF Processing, React

CERTIFICATIONS

Currently building practical AI and software development experience through hands-on projects.

INTERESTS

Artificial Intelligence & Machine Learning

Generative AI, LLM Applications

Backend Development

AI-powered Software Applications

Full-Stack Development

Problem Solving and Continuous Learning
